Summary

AI Engineer with a strong foundation in Data Structures and Algorithms, having solved **400+ problems** across competitive programming platforms. Experienced in building **production-grade AI systems** including Retrieval-Augmented Generation (RAG) pipelines, AI agents, and event-driven backend services. Interested in scalable AI architectures, vector databases, and LLM-powered applications.

Education

Amrita Vishwa Vidyapeetham, B.Tech in Computer Science

Aug 2023 – May 2027

- CGPA: **8.26 / 10.0**

Skills

- **Programming Languages:** C, C++, Python, JavaScript, HTML, CSS
- **Backend Frameworks:** FastAPI, Pydantic, Async Programming
- **AI Systems:** Retrieval-Augmented Generation (RAG), AI Agents
- **LLMs & Embeddings:** Gemini (OpenAI-compatible API), Vector Embeddings
- **Databases & Infrastructure:** Qdrant (Vector Database), Docker
- **Orchestration & Tools:** Inngest, Git, GitHub, Streamlit

Experience

GSSoC '24 Contributor

2024

- Ranked **904 / 72,000+ contributors** globally in GirlScript Summer of Code.
- Improved performance, accessibility, and maintainability across multiple open-source codebases.
- Followed industry best practices in modular design, readability, and optimization.

Projects

RAG Production App – PDF Question Answering System

GitHub: rag-production-app

- Built a **production-grade Retrieval-Augmented Generation (RAG)** system enabling natural language querying over PDF documents.
- Architected an **event-driven ingestion and query pipeline** using **FastAPI + Inngest**, enabling orchestration, retries, observability, and fault tolerance.
- Implemented document ingestion and chunking using **LlamaIndex**, generated embeddings via **Gemini API**, and stored vectors in **Qdrant (Dockerized)**.
- Executed semantic similarity search to retrieve relevant context and generate **grounded, context-aware responses** using an LLM.
- Developed an interactive **Streamlit UI** for PDF upload and real-time question answering.

Achievements

- **Winner – AlgoCrack (DSA Competition):** Outperformed participants by solving advanced algorithmic problems under strict time constraints.
- **7th Place – Shaastra, IIT Madras:** Secured a top rank in a national-level competitive programming contest with participants from premier institutions.
- **Finalist – Apogee Hackathon, BITS Pilani:** Selected among top teams nationwide for designing and presenting an innovative technical solution.
- **1st Place – Bio Ideathon, Prathyusha College of Engineering:** Led the winning team by proposing a scalable, impact-driven solution evaluated by industry and academic experts.
